

ONE PLATFORM, EVERY LOCAL BUSINESS

Your Business. Your Brand. Your Own Ordering App.

A complete ordering and management platform for any local business — restaurant, grocery, bakery, meat shop, and more — a customer app and a manager dashboard, fully working today, built under your name, your logo, and your colours.

Customer Mobile App**Manager Dashboard****Any Local Business**

Live working examples shown in this document: **Aryan Restaurant** and **Aryan Grocery** — two different businesses, running on the same platform today. Every screen pictured here is a real, running product, not a design mockup.

Stop renting your customers

Every order placed through a marketplace app is a customer that belongs to the marketplace, not to you — and a slice of every bill goes with it. A platform built under your own name changes that: the app, the data, and the relationship with the person ordering are yours.

01

Fully Your Brand

Your business's name, logo, and colours appear everywhere — the app icon on a customer's phone, the splash screen, every button. Change it once, and it updates across the entire app instantly.

02

Real-Time, Both Ways

A customer places an order and it appears on your dashboard instantly, with an audible alert. Update the status, and a push notification tells the customer live on their phone — no refreshing, no delay.

03

Delivery and Dine-In, Together

Take online delivery orders and walk-in dine-in bills from the same dashboard, with revenue reported separately for each — something marketplace apps were never built to do.

04

Built to Bring Customers Back

Run your own promo codes, and send a promotional push notification to every past customer whenever you have a new offer — no marketplace ad spend required.

0%

No per-order commission. Marketplace apps typically charge 20–30% of every order. This platform is yours to run — what a customer pays is what you keep, minus your own payment processing.

WHO THIS IS FOR

One Platform, Any Local Business

The same system underneath — branded app, live orders, a manager dashboard — already runs two different kinds of business side by side. Every other category below uses the exact same platform, ready to onboard today with no new development.

Restaurant

Full menu, dine-in & delivery, table billing.

LIVE — ARYAN
RESTAURANT

Grocery

Weight-based pricing, per-item stock counts.

LIVE — ARYAN
GROCERY

Bakery

Fresh bakes, pack pricing, daily specials.

READY TO ONBOARD

Sweet Shop

Boxed sweets, festival specials, weight pricing.

READY TO ONBOARD

Meat Shop

Cuts priced by weight, freshness-first stock.

READY TO ONBOARD

OTC & Wellness

Vitamins, personal care, wellness — no prescriptions.

READY TO ONBOARD

Flower Shop

Bouquets, occasion-based orders, per-item pricing.

READY TO ONBOARD

Your Business

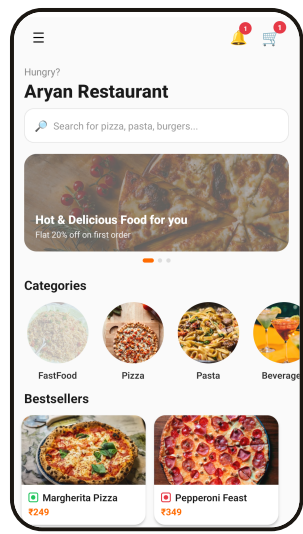

Any local shop that takes orders and delivers.

LET'S TALK

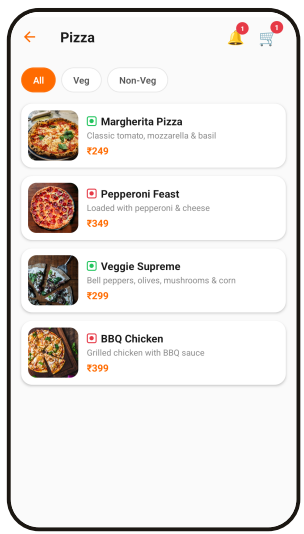

SEE IT IN ACTION

From Browsing to Checkout

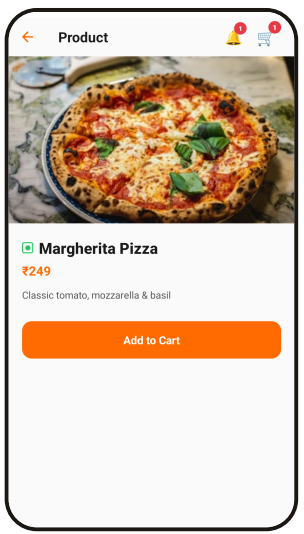

These are real, live screens from Aryan Restaurant's app — not mockups. The same screens, restyled with your name, your logo, and your menu, already power a completely different business today: Aryan Grocery.

FOR YOUR CUSTOMERS

The Ordering App

A polished, familiar ordering experience your customers already know how to use
— built specifically for your menu, your delivery area, and your offers.

BROWSING & ORDERING

- Categories & catalog with photos, organized exactly the way your business already works
- Search that finds items instantly as customers type
- Veg / non-veg filters and clear indicators on every item
- Auto-sliding offer banners above the menu — feature what you want customers to see first
- Cart that stays open while customers keep adding items — no interruptions
- Promo codes with real, calculated discounts at checkout

ORDERS & TRACKING

- Push notifications on every order update — placed, accepted, out for delivery **NEW**
- Full order history, with a spending summary by day, week, month, or year
- Cancel an order with a reason, right from the app

ACCOUNT & ACCESS

- Registration & login, with a quick demo login for evaluation
- Remember me — customers stay signed in between visits
- Forgot password, handled by email, start to finish
- Profile customers can view and update themselves
- Multiple delivery addresses, saved for next time
- Delete their own account anytime, in one tap **NEW**

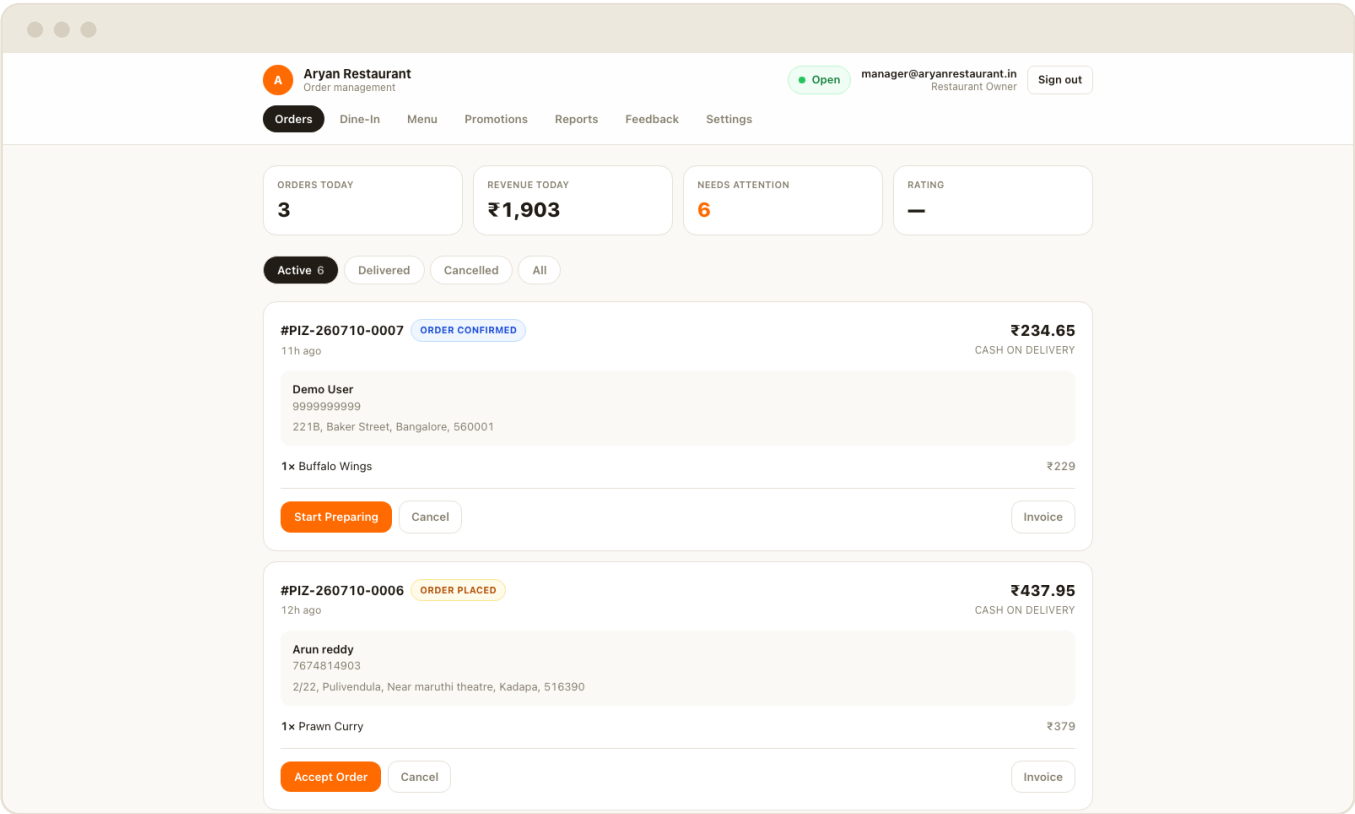

TRUST & SUPPORT

- Delivery-area check — customers outside your service area are told clearly, before they order
- In-app feedback, sent straight to your dashboard
- In-app notifications centre — a bell icon with the full history of updates

SEE IT IN ACTION

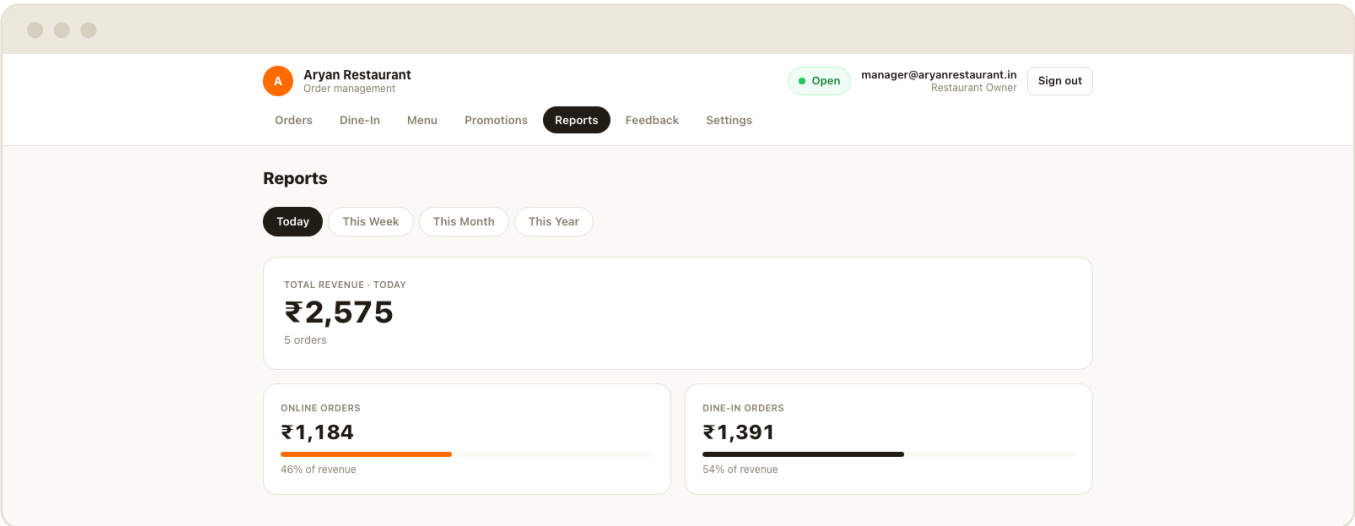

Run the Business, Live

The same dashboard shown here is what your team would use — orders arriving in real time, and revenue reported the way a real business needs it: online and dine-in, kept separate.

Live Order Queue

Every order, in real time, with one tap to accept, prepare, or dispatch

Revenue Reports

Online and dine-in revenue, reported separately, for any period

The Manager Dashboard

Everything needed to run the business day to day, from a browser on any computer — no installation, no extra hardware required.

LIVE ORDER MANAGEMENT

- Live order queue with an audible alert the moment a new order comes in
- One-tap status updates — accept, prepare, ready, out for delivery, delivered
- Every status update sends a push notification straight to the customer's phone **NEW**
- Cancellation with reason, recorded and shown to the customer
- Printable invoices for every order, one click away

MENU CONTROL

- Categories & items — add, edit, or remove anytime, no developer needed
- Photo upload straight from your computer for every item
- Pricing, veg/non-veg tags, and bestseller flags, all editable
- Availability toggle — mark an item out of stock in one tap

DINE-IN BILLING

- Walk-in order entry — build a bill from your live menu in seconds
- Table number tracking on every dine-in order
- Printed receipts, ready to hand to the customer

OFFERS & GROWTH

- Real discount codes your customers can apply at checkout
- Promotional broadcast — send a push notification to every past customer with a new offer, in one message **NEW**
- Top customers by spending, so you know who to bring back first

REVENUE REPORTS

- Revenue by day, week, month, or year, at a glance
- Online and dine-in revenue, reported separately

DELIVERY & ACCESS

- Delivery-pincode allow-list — set exactly where you deliver
- Accepting-orders switch — pause online orders instantly during a rush or closing time
- Multiple staff logins, so more than one person can manage orders at once
- Editable business name, logo, delivery fee, and tax rate — live-updating everywhere instantly

SIMPLE, TRANSPARENT PRICING

What It Costs

One flat setup fee, then a flat monthly plan — never a percentage of what you earn. Both are priced under what a marketplace app's commission already costs you today.

₹5,999

One-time setup — branded app build (icon, name, colours), admin login, guided catalog setup for your first ~30 items, and one training call to get your team started.

MONTHLY

Starter

₹599/month

- Unlimited orders
- 1 staff login
- Push notifications & promotional broadcast included
- Shared admin address
- Support by WhatsApp, within a day

MONTHLY

Growth

₹1,499/month

- Everything in Starter
- Up to 5 staff logins
- Your own admin address & login branding
- Priority same-day support

Annual billing	2 months free on either plan
Your own Google Play Store listing (your account, your ownership)	+ ₹2,999 one-time
Add your own items anytime — no limit, always free	₹0
Prefer we enter items for you, beyond the first ~30	₹10 / item
In-app card / UPI payment gateway	Roadmap — once you have GST/firm registration

READY WHEN YOU ARE

This isn't a pitch for something I still have to build.

It's already built, already running, and already handling real orders end to end — for the customer placing an order and for you managing it. Whether you run a restaurant, a grocery store, a bakery, or any other local business — give me your name, logo, and catalog, and I'll bring the same platform to life for you.

Working Today

Not a prototype — a live product you can try right now.

Fully Yours

Your brand throughout, your data, your customer relationships.

No Commission

Keep what your customers pay — no per-order marketplace cut.
